Division of NDI ENGINEERING COMPANY

**DATE:** 15 December 2017  
**TO:** Darby Borough Council  
**FROM:** Eileen W. Mulvena, P.E.  
**RE:** Engineer's Report Thru 15 December 2017

### Ordinary Streets and Sewer Maintenance

The bid tabulation is attached. We have requested references from the apparent lowest responsible bidder, as well as written confirmation of pricing since there was a significant difference from the next lowest responsible bidder. If we do not have a recommendation in place for Wednesday's meeting, I would ask that Council extend the existing sanitary, storm, and paving contracts thru 1/31/18.

### Liquid Fuels

PennDOT has approved the partial for the 2015-001 project. The final MS999 will be prepared as we have received the canceled check from the Borough. The 2016-001 project has been completed. The Partial can be submitted to PennDOT. Once proof of payment to the contractor has been received, the Final MS999 can be completed as well. It would be best to provide these canceled checks prior to December so that the project can be closed out before the MS965 will need to be completed.

### CDBG – 2016 Golf Road Infrastructure Improvements

The Borough submitted a letter to the County to permit us to use the remainder of the allocated funds for Golf Rd to do the next section of main replacement on Golf Rd.

### CDBG – 2017 Application

The County issued the Notice to Proceed in November which will likely mean a spring construction schedule.

### CDBG – 2018 Applications

At tonight's meeting, Council will need to select projects for the FY 2018 application period. It is suggested we continue to request funds to replace the sanitary sewer on Golf Rd. The Borough is eligible to apply for a second project.

### MS4 Separate Storm Sewer Permit

The Notice of Intent has been delivered to the PA DEP.

Darby's annual contribution is estimated to be \$134,082. The Collaborative has discussed each town allocating 10% of the annual amount in 2018 with the successive years higher to make up the total required by year 5. It is suggested that the Borough budget as much as feasible, and \$13,408 as a minimum for MS4 compliance.

In order to complete the requirements for Year 4 of the permit, we will need information to be provided by the Borough. We sent a second the request to the Manager.

Please note that the Darby Town Center and the Darby Fire Co. No. 1 have not submitted inspection and maintenance reports as required by their Land Development approvals. The Borough will be held responsible for the non-compliance. It is suggested the Borough send a letter reminding these owners of their responsibilities. Penalties to the Borough can be as much as \$37,500/day.

### Streets Resurfacing

PennDOT has identified streets that are not currently on the Borough's liquid fuels listing. They are asking if we wish to pursue having them added. They include: Coventry Avenue, Londonderry Lane, Shetland Road, Glen Cove Road and Keystone Avenue. If the Borough maintains these roadways, we can pursue having them added to the approved listing, so we receive liquid fuels tax monies for them in the future. Please advise.

### Pedestrian trolley bridge

The structural engineer has inspected the pedestrian bridge and we are awaiting his report.

### Demolitions

313 Darby Terrace – This work has been completed. The final invoices were sent to the County for payment.

### Sanitary Sewer Grant Funds

The PA Small Water and Sewer Grant application has been announced and is due on February 28, 2018. Council will need to pass a Resolution and submit a check in the amount of \$100 at the time of the application submittal. This can be done at the January meeting. Minimum grant award of \$30,000 and maximum is \$500,000. The required match is 15%.

### Signs

We are finalizing collection of data in anticipation of the retroreflectivity testing.

### Stormwater tip

Winter is soon upon us and we have experienced our first snow storm already. Place shoveled snow in vegetated areas; don't shovel it onto streets, into inlets, or into streams. The more water that can be absorbed by plants or sink into the ground, the less water will run off, carrying pollutants into streams. A rain garden or other planted area is the perfect place for shoveled snow.
