

Stormwater tip – June 2016

Planning and planting sustainable yards and gardens will help homeowners reduce the usual yard waste while also preventing stormwater runoff. See attached sheet for more information. One thing common to all sustainable landscaping plans is the use of native plants and trees.

Landscaping Network.com offers many valuable suggestions for planning and maintaining sustainable yards and gardens. There is information for small areas and container gardening as well as for larger yards. www.LandscapingNetwork.com

The Pennsylvania Native Plant Society is a good source for finding places to purchase native plants throughout the state.
