

## Monthly Stormwater Tip 2/2015

On Sunday, March 8, at 2:00 pm, there will be a lecture and discussion on “Sustainable Landscape Management for Landowners.” The lecture will discuss best practices for the design and everyday maintenance of your landscape. The event will be held at Penn State’s Brandywine Campus. It is sponsored by the Chester Ridley Crum Watershed Association and Penn State and is free and open to all.

On Saturday, April 25, the Darby Creek Valley Association will be holding its annual stream cleanup event at various locations along Darby Creek. Residents are encouraged to participate in this important event. More details will be available on the DCVA’s website.

IF we get any of the threatened snow...

Shoveling snow soon after it falls is the best way to prevent ice from forming on sidewalks. If you have to use a deicing product, avoid products that contain sodium chloride, which can be toxic in waterways, and use sparingly. Calcium chloride is a safer alternative for melting ice, as is a product called Safe Paw™.
