Adjournment.

pecoSM

AN EXELON COMPANY

Dear PECO Customer:

At PECO, we are committed to providing safe and reliable energy service for our customers and the communities we serve. As part of that commitment, we will be upgrading and installing new equipment to enhance the local natural gas infrastructure in your neighborhood.

About the Project:

- We will be replacing the existing natural gas equipment to enhance service in your neighborhood. This includes installing new underground pipe, which is more durable, enhances safety and improves service reliability.
- **Work is expected to begin the week of February 10, 2025. Work will be completed on Monday through Friday from 7 a.m. – 4:30 p.m.**
- **The streets involve for this project will include S Union ave from Fairview ave to Baily rd. Baily rd from S Union ave to S Wycombe ave. S Wycombe ave from Baily rd to MacDade blvd.**
- **The project is expected to be completed in August 2025.**
- **This work will be performed by General Asphalt Paving Co of Philadelphia, a qualified PECO contractor. If you have any questions or to schedule an appointment, please contact Joe Meehan of General Asphalt Paving at 215-677-2626. If you are not the owner of the building, please forward this written notice to the owner of the building.**

Most of the work will be performed outdoors, but to safely connect your property to the new natural gas main, PECO or a PECO contractor will need to turn off natural gas service and then enter your property to relight your appliances after the connection. We will need access to the natural gas appliances or equipment in your home so we can perform this work and later that day to restore service and relight any appliances. At this time, we will also be relocating any indoor natural gas meters to the exterior of the building to a location that is above-ground and is as close as practical to the existing indoor location.

This relocation work is necessary for the safety of our employees, contractors, customers, and communities and is mandated by the Pennsylvania Public Utility Commission.

Prior to work beginning, customers should mark any customer owned facilities present on the property. Examples of customer owned facilities include, but are not limited to, water services, sewer laterals, septic tanks, underground cable, drainage pipe, security lines, private lighting, dog fences, and sprinkler systems.

Maintaining Safety:

- For the safety of our crews, customers, and communities, all crews and contractors will be practicing social distancing, and we ask that all customers do the same.
- PECO crews and contractors will be following safety protocols, including wearing additional protective equipment.
- To ensure a safe environment when indoors, employee and contractor crews will wipe down all surfaces where the work is being performed before and after completing the work.

This work may occur in roadways as well as on sidewalks and potentially on your property. We will also work closely with local officials to minimize the impact on traffic and pedestrians whenever possible.

Any areas impacted on your property will be repaired, the streets will be repaved, and all areas will be restored to their original condition.

If you have any other questions about this work and/or would like to provide any supplemental information, please call PECO Work Inquiries (610) 832-6420 or email GasWorkInquiries@exeloncorp.com.

If you are not currently using natural gas and are interested in learning more about the conversion process, please call PECO New Business (866) 685-5665.

For general utility questions, you may also contact Pennsylvania Public Utility Commission, Bureau of Consumer Services at (800) 692-7380.

Sincerely,

Amy Hamilton
Vice President, PECO Gas Operations

Darby Borough Police Department
1020 Ridge Avenue
Darby PA, 19023

Darby Police and the William Penn School District have partnered up with the Alert Bus Program also known as Bus Patrol. The new program started on January 8, 2025. The school busses are equipped with cameras that capture violators who pass a school bus with the flashing red lights displayed. This system has been in place with surrounding school districts and police agencies. We are hoping that the Alert Bus Program will help keep our children safe while they enter and exit school busses throughout their day. Please use caution when driving as you approach school busses that have their red lights activated.
